🔗 <https://github.com/Aleesha19Ali> 📍 Islamabad

SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, specializing in the **MERN Stack**. Proficient in **JavaScript, React.js, Node.js, Express.js, and MongoDB**, with practical experience developing responsive, user-friendly web applications and **RESTful APIs**. Skilled in implementing **JWT Authentication, role-based authorization, CRUD operations**, and database integration while following clean and maintainable coding practices. Experienced in building reusable React components, developing structured backend services, testing APIs with **Postman**, and managing projects using **Git and GitHub**. Passionate about learning modern web development practices, solving real-world problems, and continuously improving technical skills. Motivated to contribute as an **Entry-Level Backend, MERN Stack, or Full-Stack Developer** and grow within a professional development environment.

EDUCATION

Master of Computer Science (MCS)

Virtual University of Pakistan • Islamabad, Pakistan

📅 2022 - 2024

EXPERIENCE

Freelance Full-Stack Developer

Self-Employed

📅 2025 📍 Islamabad, Pakistan

- Developed responsive and user-friendly web applications using **React.js, JavaScript, HTML5, CSS3, and Tailwind CSS**.
- Built backend services and **RESTful APIs** using **Node.js and Express.js**.
- Implemented **JWT authentication, role-based authorization, and CRUD operations** for full-stack applications.
- Integrated **MongoDB** for efficient data storage and application data management.
- Tested and debugged APIs using **Postman** and managed source code using **Git and GitHub**.
- Worked on multiple web development projects, focusing on responsive design, reusable components, clean code, and maintainable application architecture.

PROJECTS

Library Management System

📅 2026

🔗 Github link :<https://github.com/Aleesha19Ali/bookkeepingfullstack/tree/main>

- Developed a full-stack **Library Management System** to manage books, categories, library records, and user accounts efficiently.
- Built a responsive and interactive frontend using **React.js**, providing dedicated interfaces for authentication, book management, categories, and library records.
- Developed a structured backend using **Node.js** and **Express.js**, with separate routes, controllers, models, and middleware.
- Implemented user authentication and protected routes using **JWT Authentication** and middleware for secure access.
- Implemented **CRUD operations** to create, retrieve, update, and manage application data.
- Tested and verified backend APIs using **Postman** and managed the project using **Git/GitHub**.

FloraMate

📅 2026

🔗 Github link:<https://github.com/Aleesha19Ali/FloraMate-Hackathon>

- Developed a responsive and interactive web application as part of a **hackathon project**, focused on providing a clean and user-friendly experience.
- Designed and implemented the website structure and responsive layouts using **HTML5** and **Tailwind CSS**.
- Added interactive functionality and dynamic user interactions using **JavaScript**.
- Focused on clean UI design, intuitive navigation, and a smooth user experience throughout the application.

PROJECTS

StyleHive – Full-Stack E-Commerce Web Application

📅 2026

🔗 Github link:<https://github.com/Aleesha19Ali/StyleHive-ecommerce>

- Developed a full-stack **E-Commerce Web Application** with separate client and server architecture for a structured and scalable application.
- Built the frontend using **React.js**, focusing on a responsive, modern, and user-friendly shopping experience.
- Developed backend APIs using **Node.js** and **Express.js**, with organized controllers, routes, models, middleware, and validation.
- Integrated **MongoDB** for managing application data and maintaining structured database models.
- Added backend **validation and middleware** to improve data handling, request processing, and application security.
- Organized the project into reusable and maintainable frontend and backend components following a clean application structure.

SKILLS

Frontend Development:

HTML5	CSS3	JavaScript (ES6+)	React.js	Redux Toolkit	Bootstrap	Tailwind CSS
-------	------	-------------------	----------	---------------	-----------	--------------

Backend Development:

Node.js	Express.js	RESTful APIs	JWT Authentication	CRUD Operations
---------	------------	--------------	--------------------	-----------------

Database:

MongoDB	MongoDB Atlas
---------	---------------

Tools & Technologies

Git	GitHub	Postman
-----	--------	---------

CERTIFICATIONS

IBM Full-Stack JavaScript Developer Professional Certificate
